

**Let There
Be Light!**

And there was LED light

Church Lighting Renewal Project

Our church lighting is at the end of its life. New, energy-efficient, eco-friendly LED technology is now available that will provide much-improved lighting while also enhancing the beauty of our church, as well as keeping it cooler in summer.

We will be saving money immediately because of lower electricity consumption, and avoiding the thousands it costs every few years to rent equipment to replace the bulbs. Almost half of our bulbs are currently burned out, so waiting longer is out of the question. The new bulbs can last up to 25 years.

The cost will be about \$60,000. We already have more than 10% raised through our special collection at Christmas and pledges from our clergy, wardens and others. There are also Hydro-Quebec subsidies available.

ADOPT A LIGHT FIXTURE!

The main new light fixtures will cost \$600 each. You can 'adopt' one, perhaps in memory of a loved one, by indicating that on your special contribution envelope. If just 100 families did this, the project would be fully funded!! Any other amount is of course welcome. All your contributions are tax-deductible and may cost you much less than you think.

*Charitable donations up to \$200 generate a tax credit of 35%; donations above \$200 generate a tax credit of 53%. Therefore, a donation of \$600 has a true cost of only \$318 after tax credits.
